- Rowing is a very strenuous activity. If you have any concerns about your medical capacity please discuss with your personal physician to get recommendations and clearance to row.
- Information is on a need to know basis for emergencies. Please discuss any specific concerns with the coach

Medical/surgical conditions that would impact rowing or needed for emergent care:

*Physical limitations (rowing can put a strain on wrists, shoulders, back, knees):

*Medical concerns (examples: diabetic on insulin needing urgent sugar replacement for low blood sugar; Severe allergic reactions requiring an epi-pen for injection). Personal medical required items should be carried by the rower with the coach's knowledge.
